TODAY'S DATA CENTER SECURITY CHALLENGES

THERE'S A LOT TO CONSIDER WHEN THINKING ABOUT ORGANIZATIONAL SECURITY.

INTERNET   FIREWALL

Hypervisor   Hypervisor

CLEVER CYBERCRIMINALS:
They are always evolving methods, tactics, and take only minutes to compromise systems

CHANGING INFRASTRUCTURE:
Software-defined means more is happening on the trusted side of the firewall

PERIMETER DEFENSES:
Even if you have a strong perimeter defense, breaches can still occur and spread easily
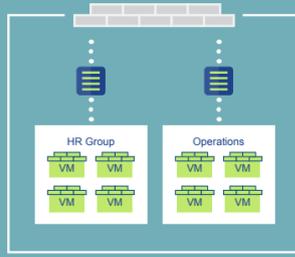

TRADITIONAL SECURITY SOLUTIONS:
Security solutions require manual processes that have trouble keeping up with virtualization

NSX AND SPLUNK TO THE RESCUE!

POW!
