

• ————— • TRANSFORM YOUR • ————— •
IT INFRASTRUCTURE
• ————— • INTO A STRATEGIC ASSET • ————— •

In just about every industry, IT leaders are being asked to increase service levels, reduce costs, improve security, and find intelligent ways to incorporate the cloud into their business. At Kinney Group, we are helping organizations achieve objectives like these while also driving incredible ROI along the way.

THE CORE ELEMENTS AND TECHNOLOGIES

Our reference architecture enables our customers to transform their IT infrastructure into a strategic asset.

Available as a
**PRIVATE, PUBLIC,
OR HYBRID**
cloud experience.

● **Infrastructure that's a strategic asset**

Our reference architecture is largely hardware agnostic and leverages software-defined technology to reduce costs and drive efficiencies

● **Insights through analytics**

Real-time machine data correlation and analytics unlock unparalleled visibility into IT operations and overall security

● **Security in all things**

Rather than being an afterthought, security is built into every single component of our reference architecture

● **Intelligent automation and orchestration**

Built-in automation reduces security risk, complexity, and unleashes new levels of IT optimization and scale across an organization

It's secure by design

Baked in security and compliance reduce the time and costs associated with securing complex environments

It's operational by design

Built-in DevOps methodology and dashboarding provides a single source of truth, adding value to both people and processes

It's integrated by design

Each component of our reference architecture passes a rigorous process and is proven to work in synergy with the others.

THE VALUE OF OUR CONVERGED INFRASTRUCTURE REFERENCE ARCHITECTURE

As either a private, public, or hybrid cloud experience, our reference architecture can create an automated IT infrastructure that's secured to federal standards for mission critical workloads.

Create a secure private or hybrid cloud

Securely leverage public cloud resources while maintaining the ability to keep mission critical workloads on premises

Create an "Amazon-like" experience

Provide infrastructure-as-a-service to IT customers with cloud provider-like simplicity and agility

Automate configuration to reduce complexity

Deploy IT assets consistently by creating the "good version" once and deploying it at scale with no drift

Lower mean time to resolution

Identify root causes faster and get a clear path to remediation with real-time insights and actionable notifications

THE VALUE OF A PARTNER LIKE KINNEY GROUP

Our talented engineers can help you take better advantage of your existing investments and plumb our reference architecture to meet your unique business or mission requirements.

We never lose sight of the human element in technology

We invest heavily in our partnerships and expertise

We have deep government, education, and commercial experience
