

# Kinney Group Splunk Services

## Splunk is powerful. We make it easy.

Organizations need to tap into data analytics and automation for business insights and operations, but find it frustrating to utilize and integrate the complex platforms required. We understand how painful this can be. Kinney Group solutions are designed to fully activate these powerful platforms, extract every bit of value they offer, and reduce the complexities of adopting them across the organization. With over 600 engagements, we're the experts in turning complex systems into business, human, and financial outcomes; providing a return on platform investment that allows organizations to focus less on technology, and more on what drives their business forward.

KGI is a services and solutions company focused on driving business and mission outcomes by harnessing the power of Splunk technologies to enable our customers to achieve their digital transformation and cloud computing dreams.

### 600+ Engagements Nationally & Internationally

Proven results with the world's most powerful and complex data systems in engagements of all sizes

### 50+ U.S. based, Splunk- certified professionals

The deepest bench of analytics and automation professionals, most with security clearances

### No one has more experience with secure and classified environments

Few Splunk services providers have Kinney Group's depth of experience with secure and classified environments.

## Frustrated with your results in Splunk Enterprise or Splunk Cloud? ITSI got you down?

How much are poor results in Splunk costing you (in both time and budget)? Can you visualize where you want to be with Splunk, but not sure how to get there? Is friction with Splunk in your organization causing you frustration?

- Having trouble finding qualified Splunk talent?
- Spending more than you want on licensing?
- Does compliance keep you up at night?
- Having trouble getting organization buy-in?
- Does managing Splunk take too much time?
- Unsure what data you're ingesting (or if it's right)?

## The stakes are high. Get the results you need with the services and tools you need to sustain them.

Whether we're reducing indexer counts by 75% and boosting performance 10x for Splunk Enterprise on-prem or reducing complexity and providing unrivaled insights through our suite of powerful applications, the Kinney Group team knows how to get the results your organization needs — fast. If security and compliance are more than buzzwords for you, Kinney Group brings a level of security expertise unmatched in the industry and a proven history of getting winning results from the Splunk platform. All of this is enabled by a world-class team of Splunk-certified experts that lead the industry in forward-thinking Splunk solutions, education, and best practices.

## How do you track your return on investment in Splunk?

At Kinney Group, we judge success through the lens of three critical ROIs:

### Mission ROI

KGI Splunk services empower significant leaps in productivity, security, and effectiveness.

### Financial ROI

Kinney Group solutions are purpose-built to save your team big money on license and Total Cost of Ownership (TCO)

### Human ROI

Splunk services from KGI enable teams to get hours back in their day and drive business forward.

## Splunk Engineering and Consulting Services

A full suite of Splunk engineering services designed to ensure successful activation, integration, and optimization of the Splunk Enterprise and Splunk Cloud platforms.

- Splunk Enterprise and Splunk Cloud architecture and implementation
- Advanced implementation of Splunk Enterprise Security (ES) and IT Systems Intelligence (ITSI) add-ons
- Application and add-on development on the Splunk platform
- Optimization services for Splunk Enterprise environments running on-prem
- Application and add-on development
- Integration of Splunk with 3rd party platforms and other advanced Splunk technologies (e.g. UBA, SignalFX, VictorOps)

## Splunk Education Services

Kinney Group is one of the only Splunk-authorized training partners in North America. Our certified Splunk trainers can assist your teams in learning and adopting Splunk technologies. We train on our blend of Splunk best practices and unique field experience, and tailor the experience to your organization's needs.

- Delivery of Splunk certification training classes at your facility
- Splunk Education for US Government classified locations
- Custom Splunk "Bootcamp" training

## You're never lost in Splunk with Atlas™

Atlas is a subscription-based platform that provides a clear path forward on your Splunk journey with revolutionary datacenter architectures, personal guidance and support delivered on-demand, and a collection of applications and utilities that provide powerful insights, instantly. The platform brings new, innovative solutions to the Splunk community and enables scalable, consistent success.

## Managed Services for Splunk

The Kinney Group MSP offering disrupts traditional managed service offerings and sets a new standard for outsourced management of the Splunk platform. KGI's MSP offering combines world-class Splunk architecture support with the power of the Atlas Platform. The end result for Splunk customers is a managed service offering that is purpose-built to enable organizations to maximize their investments in Splunk, while also dramatically reducing costs associated with operating the platform.

## Expertise on Staff (EOS) for Splunk

Avoid candidate fraud and find the right Splunker, every time. Expertise on Staff (EOS) is designed to augment your Splunk team with the appropriate level of expertise that aligns with your requirements. Unlike Splunk support provided by staffing firms or generalist consulting firms, our Expertise on Staff personnel have been fully vetted by senior Splunk engineers, trained on the latest Splunk technologies, and are backed up by our team of Splunk architects and our Expertise on Demand service.
